

CLUSTERING

Steps :

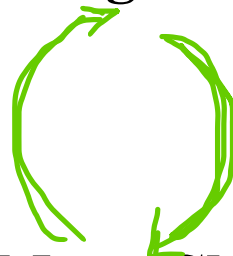

1. Decide N Cluster

2. Initialize Centroid

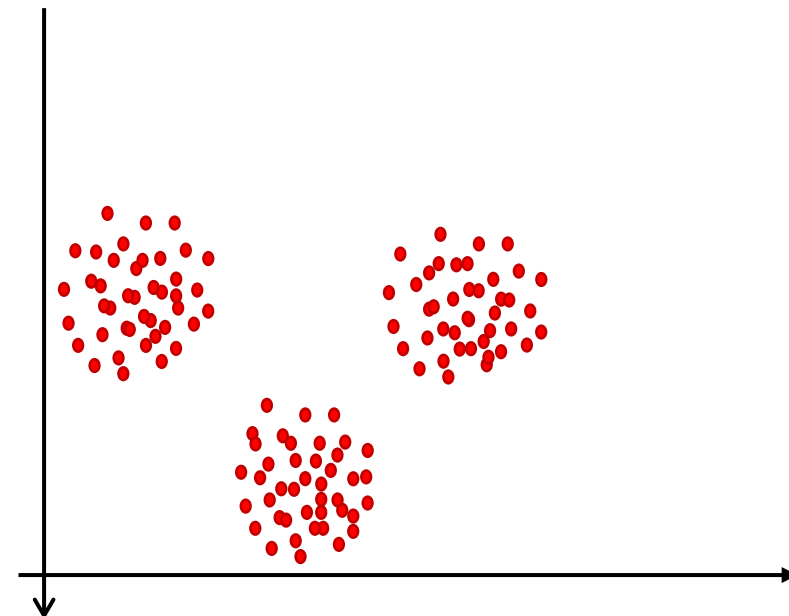

1. Assign Cluster

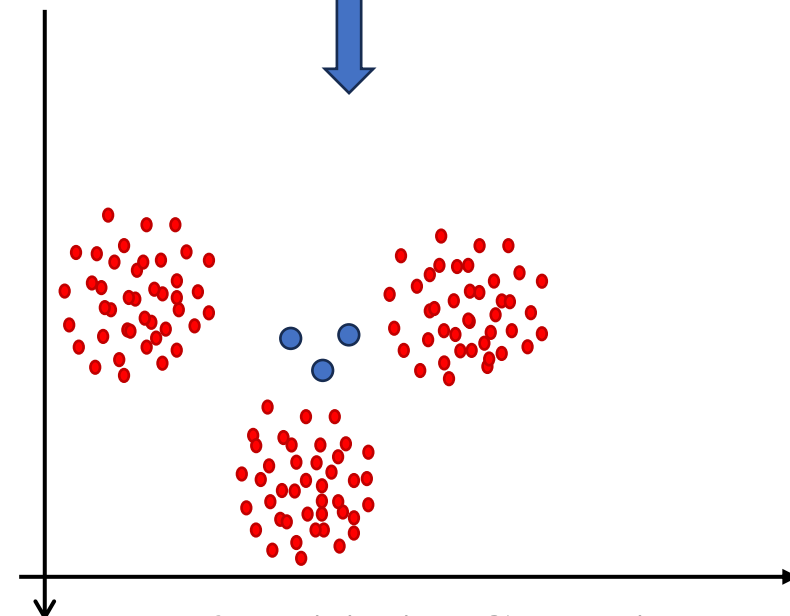

2. Move Cluster

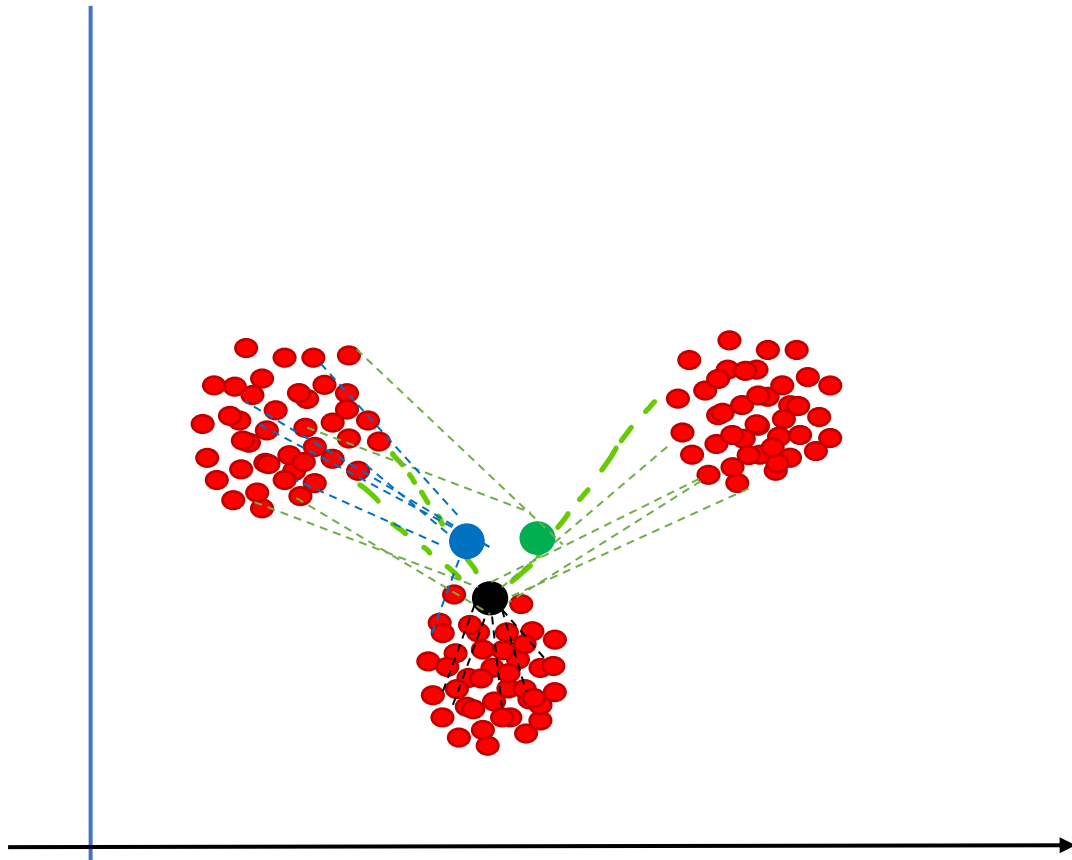

3. Finish

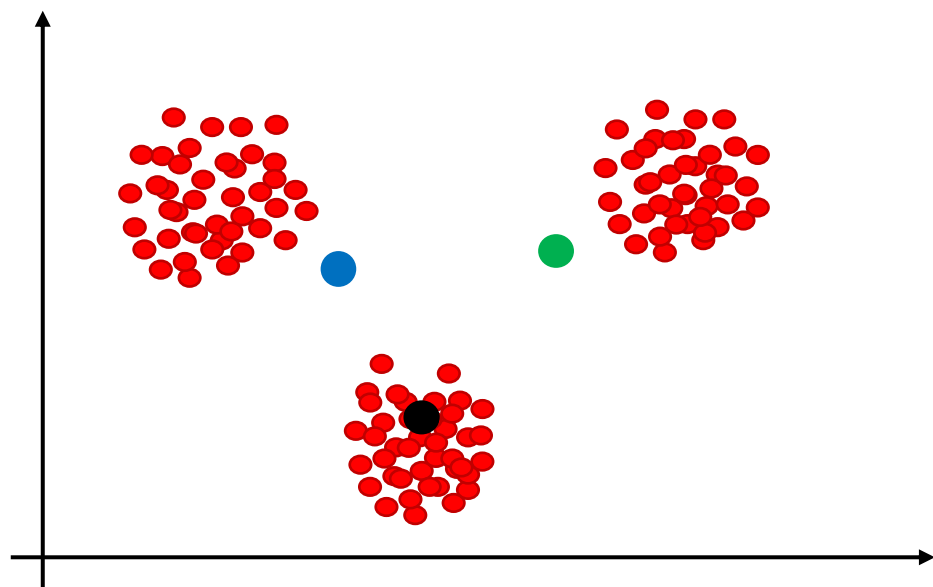

1. Decide N Cluster

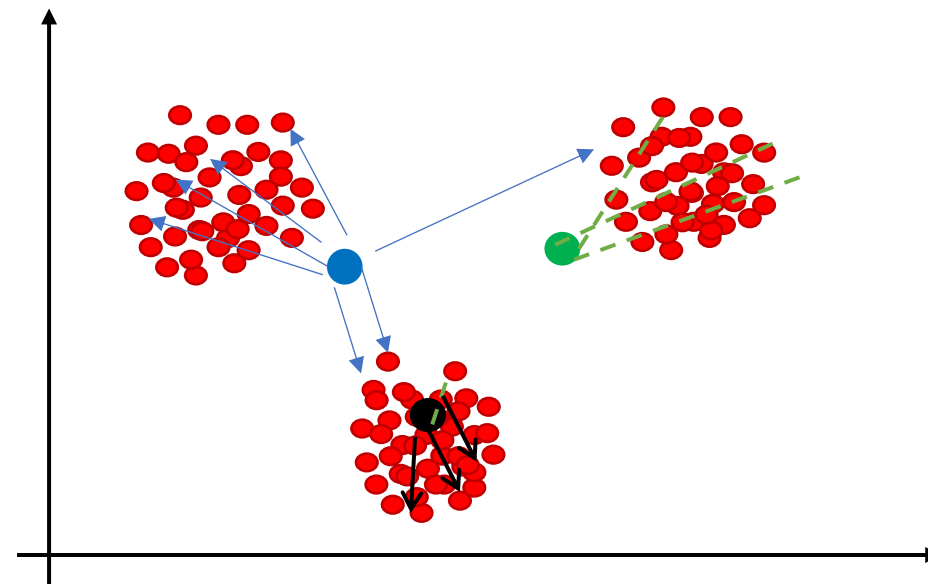

2. Initialize Centroid

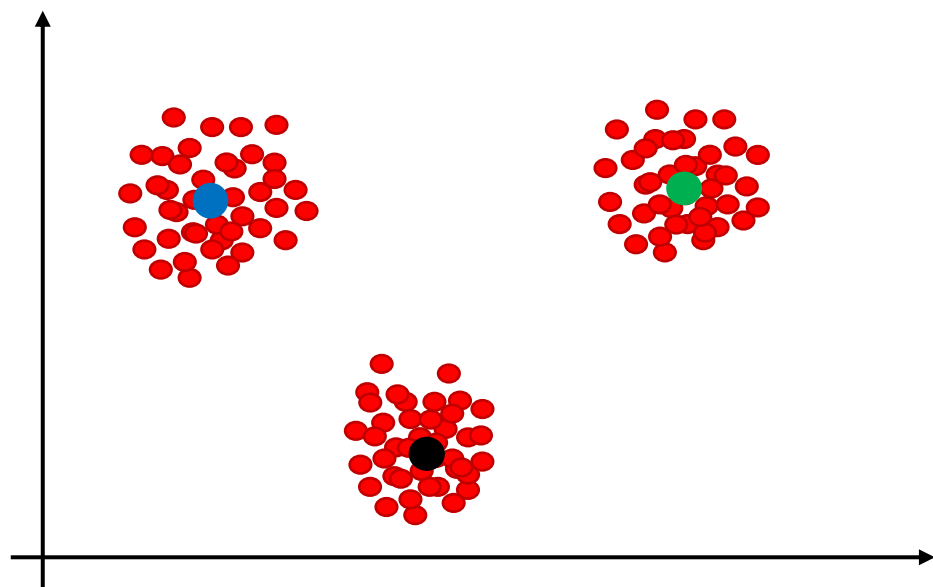

Assign Cluster

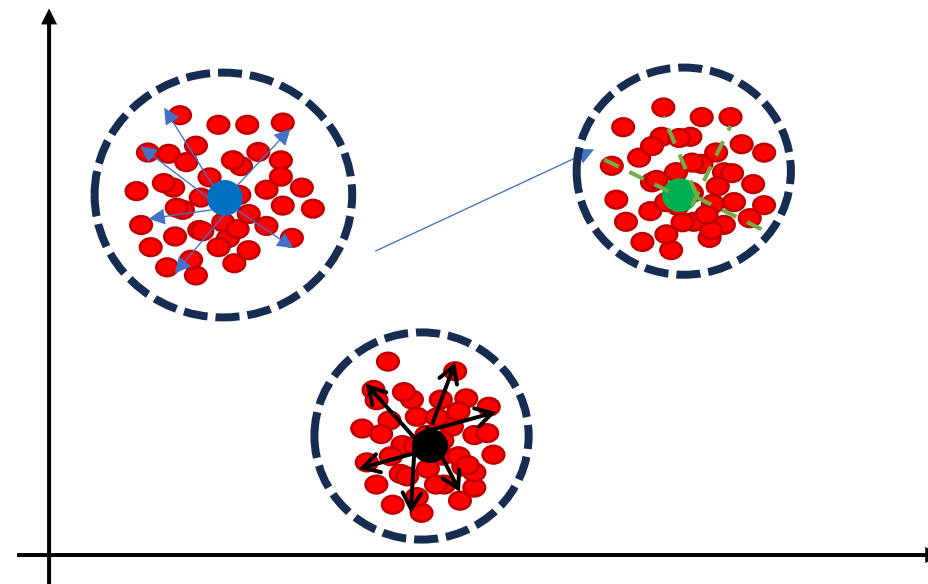

Move Cluster

Assign Cluster

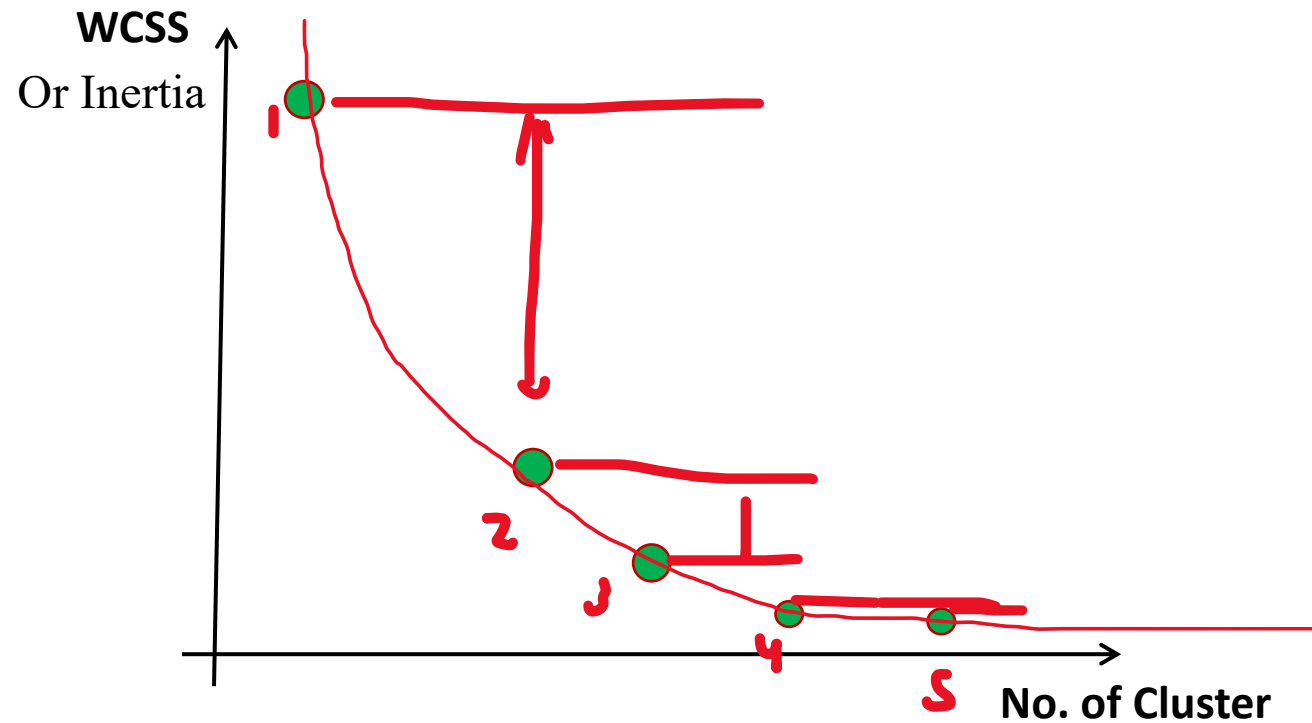

Move Cluster

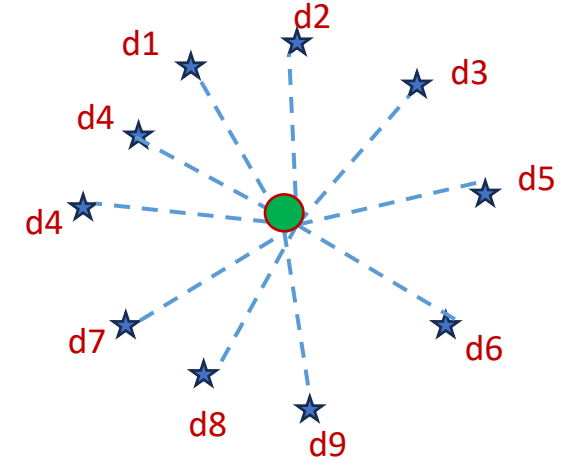

Assign Cluster

Elbow Method

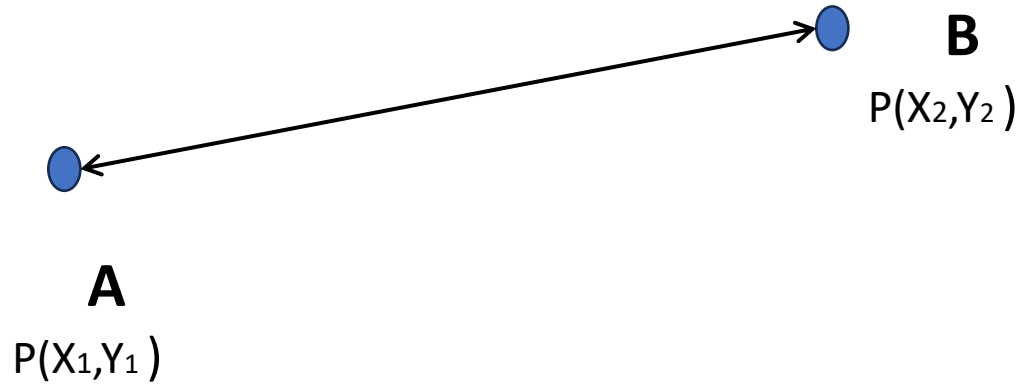

Elbow Curve

WCSS -> Within The Cluster Sum Of Squared

$$WCSS = (d_1^2 + d_2^2 + d_3^2 + d_4^2 + \dots + d_n^2)$$

$$AB = \sqrt{(X_1 - X_2)^2 + (Y_1 - Y_2)^2}$$

K-Means Clustering (Iteration 1/10)
